

Tianma Japan R&D Center - Develops the Next-generation Display Technologies and Advanced Measurement Systems

Tianma Japan, Ltd., a member of Tianma Microelectronics Group, is a designer and manufacturer of a broad range of high-quality, leading edge, display products.

We recently research and develop the following new devices and systems based on our advanced device and process technology to be commercialized in the near future.

- Next-generation display (Flexible OLED, Tactile display, etc.)
- New structure hydrogen sensor
- Advanced bio measurement and analysis systems using liquid crystal technology

Next-generation Display

- Free-form • Well-designed Flexible OLED**
- Free-eye operation**
- Tactile display**
