

# FOMM Corporation

We, **FOMM Corporation**, are performing research and development for compact mobilities and specializes in developing the compact electric vehicle which is suitable for moving a short distance (**First One Mile**) and the infrastructure for supporting our mobilities. We started mass-producing the 4-seater compact electric vehicle “**FOMM ONE**” in March 2019.

### Steering Accelerator System

With high space utilization efficiency and new steering system of accelerator by hands.

### Swapping Battery System

Equipped with detachable cassette type lithium ion battery.

### In-wheel Motor System

Reduces assembly parts by modularization  
Materializing the world smallest class mobility.

**FOMM ONE**

### Float-Drive

Electric Vehicle that adapts itself to environment in Thailand that floods often happen.

Equipped with flood countermeasure function to float on water (\*1)  
Able to move on water surface with the original wheels in case of emergency (\*2)
