

Space Entertainment Laboratory

Space Entertainment Laboratory was established in 2014 with the aim of creating an exciting future for business focused mainly on aerospace technologies. At the same time, our technology know-how has been adapted to suit the various needs identified in a wide range of other businesses such as communication, agriculture, energy and marketing. We take the greatest pleasure from the belief that our technology can help create a better society for the future. The aerospace industry is growing rapidly and we are committed to making every effort to meet our customers' demands as their valued business partner.
