

MOLCURE Inc.

Experiment Automation

Screening experimentation Evaluation of drug candidates

Wet Lab. in the loop technology

Analysis by artificial intelligence

MOLCURE provides next-generation drug-discovery by combining AI, biotechnology and robotics. Our technology can discover molecular compounds that outperform those found by ordinary approaches.

This allows pharmaceutical companies to shorten the discovery process, and reduce R&D cost.

MOLCURE has been awarded prestigious grants, such as NEDO's "Core technology development of next-generation AI and robot".

AIRBIC, Room A07, Food, Medicine and Bio-Products
