

# e-Gle Co., Ltd

## Pioneer of In-Wheel Motors

e-Gle is developing key technologies for EV.

In-wheel motor is a crucial technology that must become mainstream in the future, as they allow for greater flexibility in vehicle design by storing the motor inside the wheel. Our 4th generation motor has obtained GB/T18488 certification, the Chinese motor standard, and we are currently developing a next-generation motor with extreme performance.

G4

### G4 (Gen.4) Motor

Outer Rotor Direct Drive In-Wheel Motor

Air Cooling

Size : 399mm x 92.5mm    Weight : 35kg

Max Torque : 620Nm    Max Power : 65kw

**GB/T18488 Certified, licensable**

### G5 (Gen.5) Motor

In-wheel motor with built-in inverter

**With a groundbreaking cooling technology**

**In progress**
